

Manual for DO101

This product is a wireless switch for garage door application that turns on the switch (1s) and then switch it auto-off.

Users should add this device to eWeLink App (available on both Android and iOS) in order to remotely control the connected home appliances or devices, like the garage door opener.

Supported functions include:

- Remotely turning On/Off
- Timing Schedules
- Device Sharing
- Group Management
- Works with Amazon Echo, Echo Dot, Amazon Tap
- Works with Google Home
- Works with Google Nest

Works With Amazon Alexa

This product works with Amazon Alexa. You can ask Alexa to control the device with the following voice commands. Please note that only US/UK English and German voice commands are supported.

Try out these phrases ({deviceName} should be the name of your device):

Alexa, turn on {deviceName} - Alexa, turn off {deviceName} - Alexa, turn {deviceName} off

Alexa, turn {deviceName} on - Alexa, schalte Gerätemame ein - Alexa, schalte Gerätemame aus

After downloading the eWeLink App, open the box and press and hold the button that shows in the following diagram, beside the red light, for 7Sec until the LED light blinks fast (it shows that the device is ready for pairing). Then follow the app leads. Please note that pressing other buttons will change the device setting! After installing the app and making sure that the switch works correctly (clicking sound can be heard when turning the switch On/Off) connect the two wires of this device either to the wall switch terminals of the main unit opener or directly to the wall switch.

power supply

Connect these wires either to the wall switch terminals of the main unit opener or directly to the wall switch
